

Set Your Office Phone Free With "VoIP Made Simple"

Simply Plug Your Phone Into The Internet
Anywhere On The Planet And Make And Receive
Calls On A Normal UK Number!

"VoIP Made Simple" is an easy to use plug and play phone system. It requires no equipment at your location other than your handset and an Internet connection!

* If you work from home, from a small office or from many different locations (even abroad) then this is the perfect office phone solution.....

* It can be added to user by user and line by line. Start with one extension and just add or remove extensions to your existing set-up when your requirements change. We do all the work at our end.....

* We know that every call counts. Which is why the system delivers powerful, flexible, cost effective features. It'll make your company sound professional and help you stay fully connected with all your customers, partners and suppliers.....

* If you've had any experience at all with VoIP its probably using Skype on your PC or Laptop. You may have been less than impressed with the call quality. Well you can forget about those dodgy Skype calls with our system. Skype uses a proprietary VoIP protocol mainly optimised for PC to PC use. In contrast we use an industry standard "SIP trunk" to carry our calls over the Internet. These trunks connect into the UK's national telephone network. The result is business grade call quality indistinguishable or better than a conventional phone system.

The VoIP Made Simple system supports up to 10 extensions.

Just £9.95(+Vat) pm for the first extension then £5.00 (+Vat) pm for each additional extension

The first extension price includes one phone number / line with area code of your choice (additional lines can be added for £5.35pm + Vat. Additional inbound only numbers are just £0.75pm +Vat).

Features of each extension:-

- Remote Extensions - place your extensions in different locations or even countries...all calls between your extensions are completely free!
- Voicemail for each extension,
- Music on Hold,
- Digital Receptionist (also known as an Auto Attendant or IVR, press 1 for, press 2 for etc, etc),
- Call Blocking,
- Call Return,
- Caller ID,
- Blacklists,
- Call Transfer,
- Speed Dial,
- Call Pickup Groups,
- Call Forwarding,
- Ring Groups,
- Do Not Disturb,
- Call Waiting,
- Three-way Calling,
- Plus too many other features to list.....

Add Unprecedented Flexibility To Your Phone System With "VoIP Made Simple"

In the past if you needed to add extra lines or extension to your phone system it could turn into a lengthy and costly exercise. With the VoIP Made Simple system you just give us a call and within a matter of hours a new line or new extension will be provisioned and your chosen handsets pre-configured and dispatched to you. Its that simple and that fast!

Follow the steps below to get started right away.....

1. Decide how many extensions you need, from one handset through ten, we've got it covered!
2. Choose the Handsets you want to use from across the page (or use a softphone)->
3. How many lines do you need at one time? (Check your current broadband "up speed" as number of simultaneous calls depends on line speed. Don't worry we can advise you on how to do this or simply see our web site for more info)
4. Contact us to place your order for the VoIP Made Simple service. Just give us a call on 0800 092 5439. We always have helpful friendly staff on hand who will be delighted to answer your questions and get you up and running ASAP.

Softphones and Handsets

You don't need a computer to use our system. However for maximum flexibility you can download a "softphone" that can be used on Laptops (and PCs). This means you can make and receive calls to the system when you're out and about or when you don't have access to a handset. "X-lite" is our recommended softphone and its completely free of charge...

To make best use of all the features and functionality of the system we'd recommend using one of our handsets below. We have a special promotion running at the moment. Be sure to take advantage of these low price deals while they last.....

* Special Promotion

Only £99.17 (inc VAT)

Black Sheep Snom 300 Handset - Our entry level handset which can access all the functionality of the VoIP Made

* Special Promotion

Only £156.28 (inc VAT)

Black Sheep Snom 320 Handset - Our executive handset. Access all the functionality of the VoIP Made Simple Platform but with extra programmable line and feature buttons.
